

Microsoft Packaged Services

Assess, Address, and Achieve Success

PC Connection's Microsoft Packaged Services allow customers with Value, Select, Select Plus, and Enterprise Software Assurance Benefits to redeem Microsoft Services Vouchers for full deployment planning assessments. This is the perfect way to assess the company-wide deployment of Microsoft solutions such as Windows operating systems, Office, Exchange, and SharePoint.

Planning and Deployment Made Simple

PC Connection's Microsoft Packaged Services help by assessing the readiness of your infrastructure. The data our certified technicians collect will be used to make deployment, migration, and Microsoft best-practice recommendations for three main service pillars:

- Desktop Deployment Planning Services
- Microsoft Exchange Planning Services
- Microsoft SharePoint Planning Services

Desktop Deployment Planning Services (DDPS)

DDPS is used for the planning and deployment of Microsoft Office and Windows solutions. Through this packaged service offering, PC Connection works with you to provide a deployment plan for your Microsoft desktop products. This ensures greater productivity and increased usage of your Microsoft technology investments.

Microsoft Exchange Planning Services (EDPS)

EDPS allows you to plan for a Microsoft Exchange implementation. Working with certified Exchange consultants, this assessment provides you with feature reviews, best practices, specific requirements, and a comprehensive deployment plan.

Microsoft SharePoint Planning Services (SDPS)

SDPS helps you plan for the successful deployment of Microsoft SharePoint, so you can maximize the foundational capabilities of your SharePoint portal server. Our SharePoint-certified consultants analyze your environment and recommend tools, best practices, and services that fit your SharePoint requirements.

Microsoft Packaged Services Process

- Choose the Microsoft Packaged Service Voucher that best fits your deployment or migration plan
- Assign the voucher and schedule the assessment
- Vouchers can be assigned in increments of 1-, 3-, 5-, 10-, and 15-day engagements*
- Review the assessment recommendations
- Engage follow-up deployment or migration services as needed

*Packaged Service Vouchers are determined by the customer's Software Assurance coverage. Customers have the right to convert training vouchers at a 3:1 rate for additional Package Services Days.

» Ensure your next Microsoft solution deployment is a smooth one.
